Subject: 360° Virtual Tour for Marketing and Promotional Activities

Dear Sir,

This is with reference to earlier communications regarding the development and utilisation of 360° Virtual Tours for our project sites.

2. The 360° Virtual Tour for your respective node has been completed and shared under the below link. These digital assets have been developed as a standardised outreach tool to enhance project visibility and to support investor facilitation, marketing, and promotional activities undertaken by the SPV.

Link: https://drive.google.com/drive/folders/1WV0Z7XLKLvrBfPD1hZHg23KmziJrrhGA

3. In this regard, it is suggested that:

- SPVs which already have an official website are requested to host the 360° Virtual Tour on their respective websites at an appropriate location, for ease of access by stakeholders.
- SPVs which do not currently have an official website may consider creating the same wherein the 360° Virtual Tour to be hosted as part of the project's digital outreach and investor engagement efforts.
- Additionally, the Virtual Tour may also be utilised in **offline mode**, including during investor presentations, meetings, roadshows, exhibitions, and other promotional engagements.

4. The objective of this initiative is to enable SPVs to effectively showcase on-ground progress, infrastructure readiness, and project potential to stakeholders and prospective investors through immersive visual content.

5. A step-by-step guide for hosting and using the 360° Virtual Tour (both web and offline versions) is enclosed as '**Annexure–A**' for ease of implementation. SPVs are encouraged to ensure timely and effective utilisation of these assets for outreach purposes.

Cont..2...

6. It is requested to ensure appropriate utilisation of the 360° Virtual Tour and confirm the status of hosting and/or usage at your end. The NICDC team shall remain available for any technical assistance or coordination support required in this regard.

With warm regards,

Yours sincerely

(Rajat Kumar Saini)

Steps for Using & Integrating the 360° Virtual Tour Files on Website

Please find below the simple steps to use the virtual tour files that we are sharing with you. You will receive **two folders**:

1. **Web Version** (for hosting on your official website)
2. **Offline Version** (for local use without internet)

1.) Web Version (Hosting on Your Website)

To host the virtual tour on your website, please follow these steps:

1. Log in to your website's server (via cPanel / File Manager / FTP).
2. Go to the root directory of your website (the same location where your website files are stored, commonly public_html).
3. Upload the Web folder that we provide (it will be in a zipped format).
4. Unzip the folder after uploading.
5. Rename the unzipped folder to whatever URL name you want.

Example:
If your website is https://nicdc.in
and you want the virtual tour to open at:
https://nicdc.in/x

Then simply rename the folder to x.
Once renamed, the tour will automatically be accessible at that URL.
You can name the folder anything you like, and the virtual tour will appear at:
yourwebsite.com/folder-name

2.) Offline Version

The offline version is the easiest to use and does not require internet or hosting.
Inside the Offline folder, you will find two files:

1. One file for Mac
2. One file for Windows

If you are using a Mac, simply double-click the Mac file.
If you are using Windows, double-click the Windows file.

That's it, the virtual tour will open and run automatically.
